

100% TRACEABILITY ACROSS OUR ENTIRE PRODUCT RANGE

How Do We Do It?

GAP Analysis

Analysed over 6,500 products to ensure traceability either by product demarcation, stock accuracy profile, single source supplier or traceable packaging.

Supplier Audit (Coil to Customer)

Visited, audited and witnessed the production process from raw material to complete product to ensure traceability and supply quality.

Product Control

We have a comprehensive sign-off procedure before we stock any new products, ensuring they are compliant and traceable.

Industry Leading Stock Management

Across our branch network we have 99.7% stock accuracy, value and volume. This is externally audited and verified.

Continuity of Supply

A primary accredited supplier with a secondary supplier in reserve ensuring continuity of supply, with a limit of two suppliers per product range.

How Does This Benefit You?

Confidence in Our Product

Our vetted supply chain means reliability, quality, trust and support.

Meeting the Requirements of the Building Safety Act

We provide the **Golden Thread** of information, product data, and evidence of traceability for all our products.

Manufacturer Support Network

Guaranteed product technical support and confidence from our global manufacturer network.

Complete Chain of Custody Across Our Product Range

The coil to customer process audits our supply chain, removing risk of product contamination and guarantees continuity of supply.

Meeting Your Clients Needs

Stakeholders and clients often require evidence of traceability and technical product data.
